

Input Handler

Variables

- vector<int> counter;
- vector<ifstream> file;
- vector<string> fileName;

Functions

- bool isBlank(string line);
- bool isComment(string line);
- bool isMultiComment(string line);
- bool isBase
- bool isNueva
- bool isReusada
- +InputReader();
- +void handleInput();
- +bool openFile();
- +void countLines();
- +vector<int> getCounter() { return counter; };
- +string getFileName() { return fileName; };

Output Handler

Variables

- string fileName;
- vector<int>counter;
- const static int iHyphens = 44;

Functions

- +display()
- +saveFile()
